

brightpay connect

Getting your clients on board

The first step in rolling out BrightPay Connect will be getting your clients on board.

For an employer using BrightPay Connect, the software has all the features of a HR software package combined with the benefit of being tied in with payroll.

BrightPay Connect saves employers time on traditionally cumbersome admin tasks, allowing them to focus on what they do best!

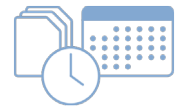

Employer Payroll Dashboard:

The BrightPay Connect dashboard allows employers to login and view payroll information such as payslips and P45s as well as amounts due to HMRC, anytime, anywhere.

Employee Calendar:

- View at a glance who is on leave with the employee calendar.
- Annual leave management: approve annual leave online: no more paper requests or spreadsheets.
- Track sickness absence: identify absentee patterns and take steps to reduce absence levels.
- Sync to your payroll: All approved leave is automatically synced back to the payroll system on the accountant's PC.

Document upload:

Issue, track and store employee documents such as contracts, handbooks, performance reviews and training documents, meaning no more crammed paper files. Internal company noticeboard also included.

Employee self-service:

A secure employee portal allows employees to view their own payroll documents (including payslips, AE letters etc.), request leave and change basic employee information, without taking up their manager's time.

It's secure!

BrightPay Connect is hosted on Microsoft Azure - all information is fully encrypted.

At just £49 per year and with no set-up needed, BrightPay Connect is the obvious online HR and payroll solution for any small business.
