Accountancy, tax, payroll and  
practice management software

**Presenters**

**Eleanor Vaughey**  
Marketing Executive

**Holly McHugh**  
Marketing Team Lead

## Agenda

1. The Importance of cyber-security
2. GDPR best practices
3. Backup your payroll data to the cloud
4. Give clients more control over their payroll data
5. Store important reports in a centralised location
6. Let employees access payslips and documents from anywhere
7. Questions and answers

## Your practice's online security

95% of all cyber security breaches in 2021 were due to human error

## Your practice's online security

- > Just how safe is your clients' payroll data?
- > How can your practice improve its online security?

1. Follow GDPR best practices

Follow GDPR best practices 

➤ GDPR breaches are much more common than you think

Follow GDPR best practices 

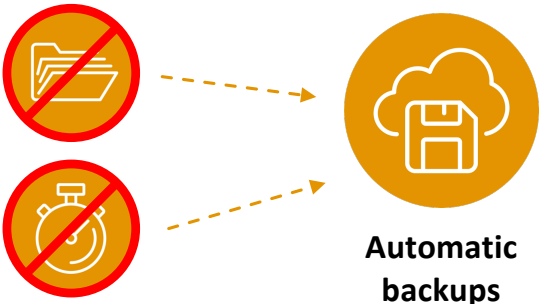

- Sending report to another client
- Personal details altered
- Emailing the wrong payslip
- Computer gets stolen

2. Backup your payroll data to the cloud

Backup your data to the cloud 

Automatic backups

3. Give clients more control over their payroll data

Give clients more control

- Give your clients more control over their payroll data
- Send a payroll summary before it's finalised
- Let clients submit new payroll information to an online portal

4. Store important reports in a centralised location

Store important reports in a centralised location

Paper-based reports around the office pose security risks

Reports that flow from payroll software to an online portal

5. Let employees access  
payslips from anywhere

Let employees access payslips  
from anywhere

- Endless list of security issues  
that can arise for employees
- Falls on you to rectify these  
issues

Let employees access payslips  
from anywhere

- Save you hours of unnecessary  
stress
- Overall boosts security of payroll  
data

How BrightPay can help

**Bright**

**1. Automatically backup your payroll data, while you work**

**Bright**

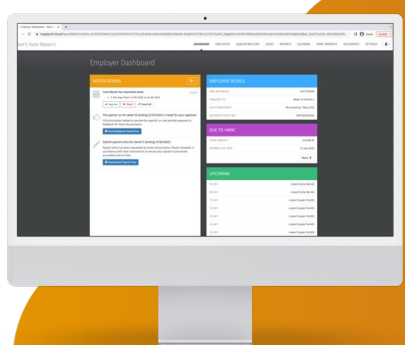

**Automatically backup your payroll data to the cloud**

- Backs up your payroll data to the cloud every 15 minutes
- Chronological history of your payroll backups stored in the cloud
- Easy to retrieve and restore data from any point in time

**Bright**

**2. Have client and HR portal**

**Bright**

**Have a client and HR portal**

- View all distributed payslips
- Upload important HR documents
- Access important payroll reports
- Manage their annual leave

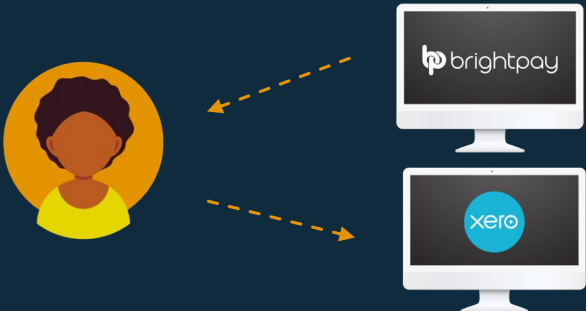

**Wow your clients' employees with a self-service app** 

- Gives employees more control over their personal data
- Aligns with GDPR best practices
- Employee's right to know what's on file of them

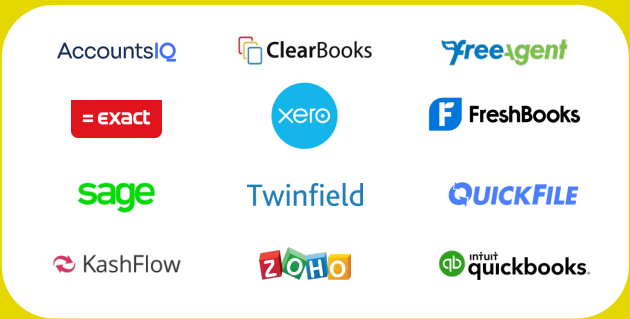

**4. Reduce errors and increase online safety with API integration** 

**Reduce errors and increase online safety with API integration** 

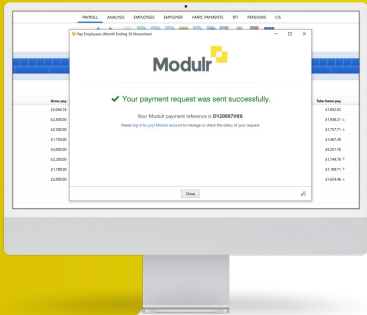

**Reduce errors and increase online safety with API integration** 

Reduce errors and increase online safety with API integration 

Reduce errors and increase online safety with API integration 

- Real-time 24/7 payments
- Through your payroll software
