What is the cloud?

Examples of the cloud

Business resilience and the cloud

Remote working

Disaster recovery

Agility

Security and compliance

Process payroll from anywhere

Flexibility, reliability, and advanced security

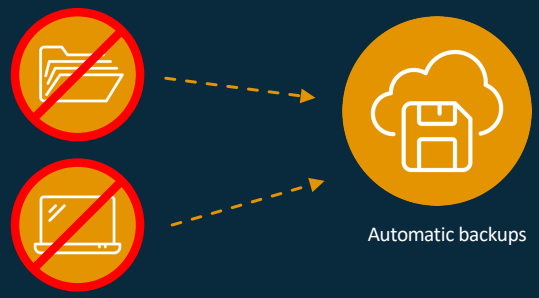

"A new software just released to help streamline my firm's admin? Great!"

"Oh, I have to come into the office to use it? Scrap it."

Security

- 4 out of 10 UK businesses suffered a cyber-attack or data breach in 2021
- A data breach can cost a business an average of £8,460

Backs up your data to the cloud

Flexibility

- It's a hassle to maintain and update desktop-based systems

Flexibility

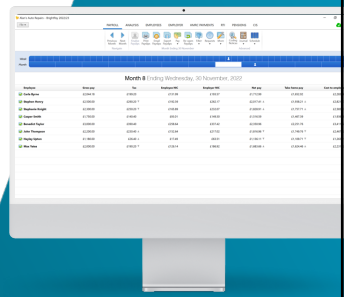

- Work simultaneously from any location with cloud software
- Real-time changes as you work

Differences between BrightPay's desktop and cloud solutions

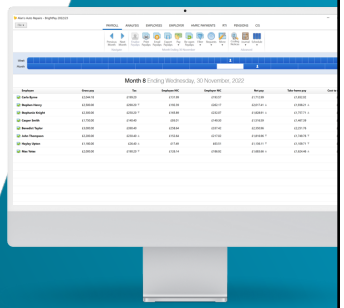

Advantages of BrightPay for Windows or Mac

- Don't need to be connected to the internet
- Desktop-based software may be faster and more responsive
- You don't have to worry about downtime due to data centre power outages

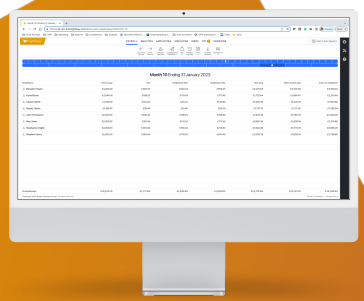

Are there any disadvantages?

- You will need to manually back up payroll data
- Doesn't offer the same flexibility when it comes to working from anywhere
- Updates are manual
- Multiple users cannot work on the same file at the same time

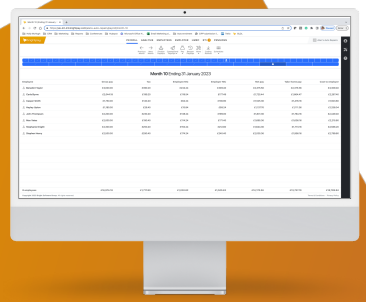

Advantages of BrightPay's cloud payroll solution

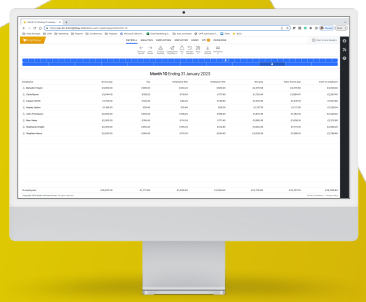

- Can be accessed from an internet browser
- No downloading or updating the latest versions
- Multiple users can work on the same file simultaneously

Benefits of BrightPay's cloud payroll solution

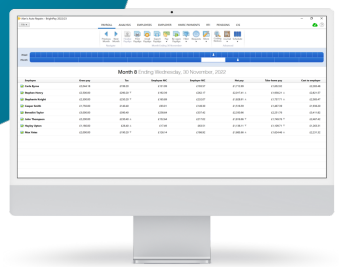

- Access from any device can improve productivity
- Files wont be corrupted, deleted or lost
- Your data will be stored on a server at a data centre, hosted by Microsoft Azure

Are there any disadvantages?

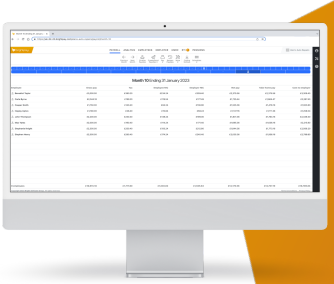

- Cloud can go through events like power outages, server reboots, delays, and downtime
